*CLIMATE MAP APP*

## INTRODUCING THE INFINITY CALENDAR

Climate Change Calendar is designed to inspire action and learning! Each month focuses on a different climate change topic and includes learning materials such as videos, case studies, and activities to help you reduce your impact on the environment. The Calendar is perpetual which means that you can use it year after year! The Calendar is available in English, Croatian, German, Cypriot and Italian.

Here are some ideas for how you can make the most of it:

- Climate Challenge: Set personal climate change goals and track your progress.
- Climate Acts: Write down one positive thing you've done for the environment each day.
- Gratitude Calendar: Take a moment daily to jot down something you're grateful for.
- Birthday Calendar: Record the names and birthdays of your loved ones, along with other annually recurring dates.

# INTRODUCING THE INTERACTIVE ONLINE CLIMATE MAP

We created an online interactive Climate Map that provides access to climate change resources and integrates with the C4CC app. It serves as a gateway to a wide range of educational and practical resources that could be used by various groups, from educators to community leaders, in different settings.

You can use the interactive map to explore climate change prevention efforts across various European countries. All you have to do is to select your country and dive into detailed case studies, step-by-step guides, and YouTube videos to find inspiration for how you can contribute to the fight against climate change in your own community.
